IK3D Model Instructions

IK3D Model Instructions

Title:

Moose Wine Bottle Holder (Fuzzy skin)

Settings:

	Amount	Notes
Resolution	0.22	
Infill	5-8	Rectilinear
Walls	2-3	
Raft	Yes	Recommended for the horns

Supports:

NO

Supports notes:

Recommended to print with:

FDM

Final notes / materials needed:

This model is smooth and has no texture as it's meant to be used with fuzzy skin.

If you are not using a Bambu Lab printer, you will have to add modifiers to:

-Mouth, parts holding the wine bottle and holes for the horns. But you might also want to add them on the eyes and hooves for a better looking print.
