Tags: [displaystand](#) [dummy13](#)

This is a simple display stand for **Dummy 13** and other **13 Series** figures.

The stand consists of a base and two arm segments. You can then choose an adapter for your model from the included files.

For best results, use ABS or PETG filament. PLA can become loose over time due to material creep.

If you are selling Dummy 13, you can include these parts under the same attribution.

This stand is ideal for adding some stability to standing poses, but can also be used for aerial poses. For a more sturdy version, see the **Lucky 13 display base 2.0**.

If this model brought you joy - or profit - please consider supporting me with a one-time donation.
