

MeshSafe

➤ Point of contact

Lujie Chen meshsafe3d@gmail.com

➤ Download MeshSafe

Windows version: Download MeshSafe.exe in Win 32 or Win 64 folder to your computer. There are optional language packages in sub-folders, such as de_DE, and es_ES. Copy a sub-folder and put it in the same parent folder on your computer that contains MeshSafe.exe. When selecting a language from MeshSafe menu “Help -> Language”, the user interface will change to that language. If a language package is not found, MeshSafe will remain in English.

de_DE: German

es_ES: Spanish

fr_FR: French

it_IT: Italian

ms_MY: Malay

pl_PL: Polish

pt_BR: Brazilian Portuguese

sl_SI: Slovenian

zh_CN: Simplified Chinese

zh_TW: Traditional Chinese

Mac version: Download MeshSafe.app.zip in Mac 64 folder to your computer. The language packages are embedded in MeshSafe app.

➤ Run MeshSafe

Windows version: Run MeshSafe.exe.

If MeshSafe can't start, it is most probably that a computer does not have Visual Studio redistribution package. Please install the package: vc_redist.x86.exe for Win32 OS at Win 32 folder or vc_redist.x64.exe for Win64 OS at Win 64 folder; then run MeshSafe again.

Mac version: Unzip MeshSafe.app.zip and run MeshSafe.

If MeshSafe can't start, it is most probably that a Mac is set to run apps downloaded from Apple store only. Please set “Allow apps downloaded from Anywhere to run on this Mac” in Security and Privacy, General setting.

On Linux, use Wine software to run any Windows program including MeshSafe.exe.

➤ **MeshSafe license**

To obtain a computer's license ID, run MeshSafe and go to "Help -> About"; there is a line of license ID. Copy the entire line, including braces and OS information, and send it using a web form at www.luban3d.com/meshsafe or email it to meshsafe3d@gmail.com.

➤ **Upgrade**

Within a licensed period, all upgrades are free. To get an upgrade, download the latest MeshSafe and overwrite the old version. Re-licensing is not needed unless you want to change a computer to run MeshSafe.

➤ **Documentation**

Documentation is in the "Doc" folder.

➤ **Technical support**

Technical support is available at LuBan Facebook group: <https://www.facebook.com/groups/1067858546711484>.
